

# SnapFlux PDF Creator

**SnapFlux is the leading solution to integrate time controlled market data snapshots from multiple data vendors into core banking, risk management, or similar back office and treasury systems. SnapFlux PDF Creator takes the data snapshots to produce powerful documents.**

Corporations frequently require comprehensive information on financial market sentiments expressed in indices. They also need the current value of their own or affiliated companies' shares as well as foreign currencies' and commodities' prices that affect their line of business. This information is typically generated by treasury departments and disseminated within the corporation via intranet. Why not automate the pdf creation instead of relying on a manual workflow using an Excel plugin of a vendor terminal?

SnapFlux PDF Creator. A tailor-made solution by oraise that is customised, safe, and reliable

oraise supports you in defining a print template that is uniquely cutomised to your specific layout requirements.

## SnapFlux PDF Creator - Advantages at a glance

- PDF output (easy to distribute internally and externally)
- Individual layout with customer logo and static graphical elements
- Latest market data snapshots can be inserted into placeholders or tables
- Charting time series (including own data)
- Statistical values can be derived from latest values and time series (YTD, YOY, MTD, MOM)
- Data deliveries can be sourced from available vendors (Refinitiv, Bloomberg, SIX FI, ICE, ICAP, etc.) and also from internal data sources
- No own market data infrastructure required (hosted solution)
- Snapshot based, no real-time data license required
- Easy implementation and evolution of the design on request

## oraise supports you during setup and operation

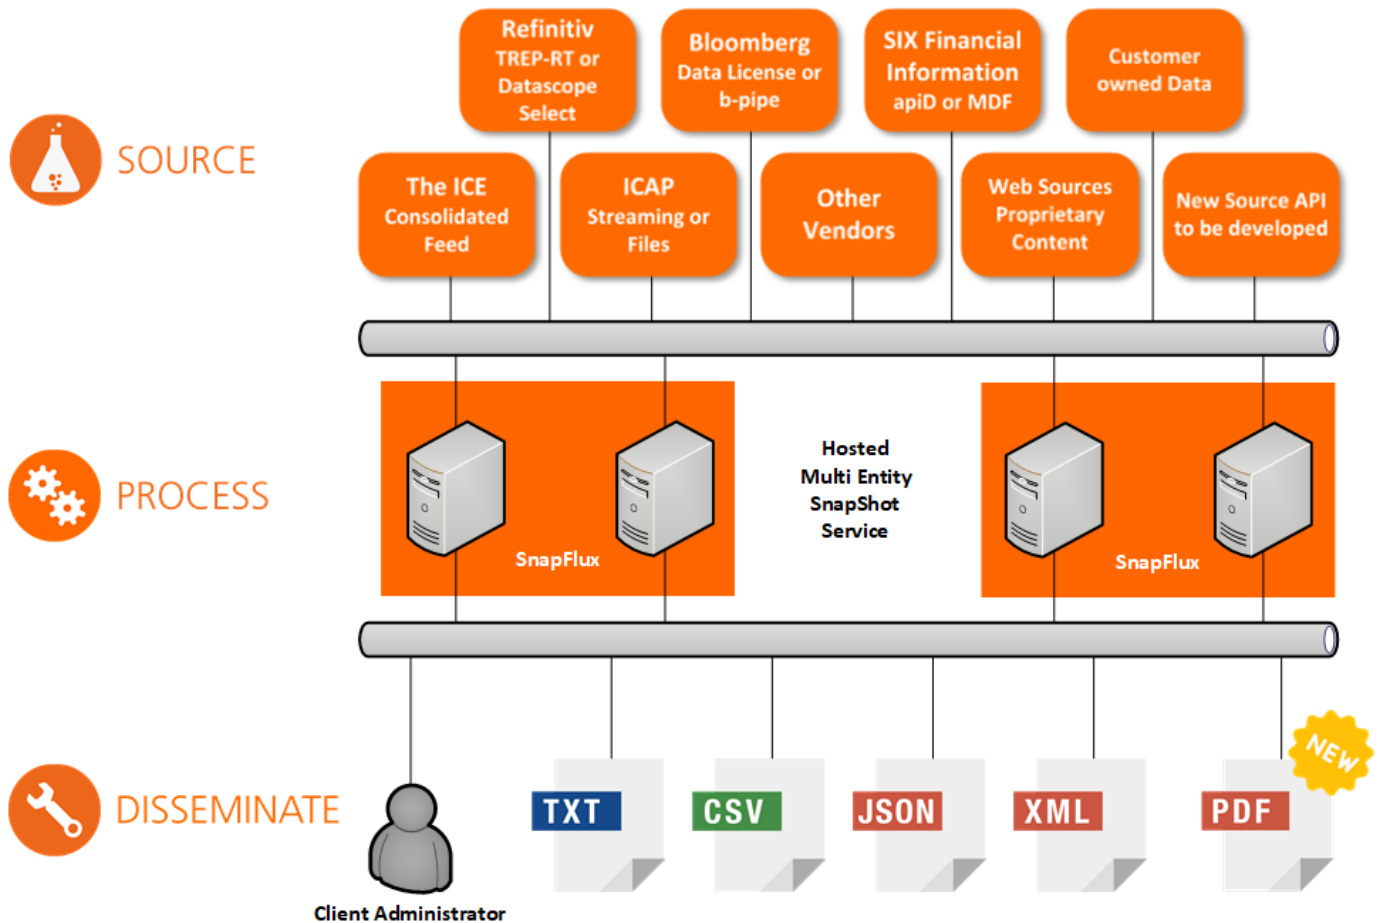

The oraise infrastructure services can be commissioned directly. The services include the following elements:

- Set-up of snapshot schedules for the data used - timing at customer's discretion
- Definition of template layout according to specification (logos, graphics, data)
- Vendor compliant reporting of data consumption
- Automated document production
- Operation in Multi-Entity environment

## Infrastructure

The core component of the infrastructure is the SnapFlux Multi-Vendor/Multi-Entity infrastructure hosted by oraise. The PDF documents are created and can be distributed on request. Each customer can collect their own time series for charting and statistical calculations in addition to the delivery of current snapshots to the pdf creator.

## Overview

## About oraise

With the ISO 27001 certification of our operational and organisational departments responsible for the delivery of IT services, we ensure full compliance and are able to offer outsourcing services for essential business processes. Our forward-looking solutions enable financial institutions, exchanges, stockbrokers and treasury departments to use information technology in the front office more efficiently, more flexibly and ultimately, to make your business more competitive.

With more than 25 years of experience in financial markets, we offer a service portfolio covering consulting services, software development and implementation, operations and support. Extensive knowledge in processes and structures of financial enterprises combined with profound technical expertise enables oraise to deliver innovative and forward-looking solutions. Be it software or system development, integration implementation or operation of trading-, market data or front office systems – the focus of oraise is on creating customer value i.e. improved business processes, reduced costs and empowerment of competitive edge.

oraise is an owner-managed company with presences in Germany and Switzerland at several locations including the well-known financial centres.
